

1

Connect your Apple TV

Use the power cord to connect your Apple TV box to the power outlet. Then connect the Apple TV box and the TV using the HDMI cable.

To access the Apple TV interface, select the input channel on your TV set for the HDMI port to which you have connected your box.

2

Set up an internet connection

Search for your Wi-Fi network in the settings and connect the Apple TV box to the internet. You can find the network key on the back of the router. Alternatively, you can also connect the box to the router using an Ethernet cable.

3

Sign in with Apple ID

Sign in with your Apple ID. If you don't have one, you can easily create one with [Apple](#).

Tip

If you are on the same Wi-Fi network, you can also use your iPhone or iPad to enter text.

4

Download the Teleboy app

Search for "Teleboy" in the App Store and download the app. It will then appear as an app icon on the Apple TV interface.

5

Register with Teleboy

Open the Teleboy TV app and log in with the data you provided during registration. The best way to do this is to open the URL www.teleboy.ch/link on a second device.

6

Using the Apple TV remote

The various functions of the Apple TV remote control are displayed at the beginning. However, you can access them again at any time in the settings (menu bar on the right - instructions - player).
